

AdoptOpenJDK / Java™ Support

[mk_image src="/wp-content/uploads/2019/02/adoptopenjdk-dark.png" image_size="medium" margin_bottom="30"]Oracle has changed its [licensing and subscription model for Oracle's Java](#). For Java™ 8 or 11+, you will now need to choose one of the following options:

1. Stay on an unsupported/insecure version of Java™
2. Pay Oracle a subscription fee for Oracle JDK / Java™
3. **Use a drop-in OpenJDK™ distribution and get free LTS binaries for 5+ years!**

The jClarity team co-founded [AdoptOpenJDK](#) which is the **free** (\$ and usage) OpenJDK™ distribution replacement for Oracle's Java backed by major vendors such as Amazon, Azul, GoDaddy, IBM, Microsoft, Pivotal, Red Hat, SAP, and many others.
