

Products

Oracle has changed [its licensing and subscription model](#) for Oracle's Java. For Java™ 8 or 11+, you will now need to choose one of the following options:

1. Stay on an unsupported/insecure version of Java™
2. Pay Oracle a subscription fee for Oracle JDK / Java™
3. **Use a drop-in OpenJDK™ distribution and get free LTS binaries for 5+ years!**

The jClarity team co-founded [AdoptOpenJDK](#) which is the **free** (\$) and usage) OpenJDK™ distribution replacement for Oracle's Java backed by major vendors such as Amazon, Azul, GoDaddy, IBM, Microsoft, Pivotal, Red Hat, SAP, and many others.

Rock Solid AdoptOpenJDK / Java™ Support

Long pauses? Memory leaks?

LOCALLY INSTALLED

Censum intelligently extracts **meaningful answers** from the complex Java™ (JVM) Garbage Collection (GC) sub-system.

```
[mk_custom_list style="mk-moon-checkmark-3"]
```

- Finds optimal JVM GC settings
- Provides plain answers
- Analyses in seconds
- Parses any GC log, Java 6-11+!
